

**FAQ**  
**SWITCH LEG LEAP MOUNT**  
**October 20, 2022**

**Question:** What are the leg position requirements of a switch leg leap mount (AHS)?

**Answer:**

- The first leg (lead leg) should swing forward to a minimum of 45° prior to swinging backward and must be straight. (No stag allowed)
  - Deduct up to 0.1 for insufficient height of leg swing.
- The split expectation is 180° after leg separation.
  - Deduct up to 0.2 for insufficient split (135° - 180°) after leg change.
- Deduct for execution and amplitude errors.
